

View the wireless networks available and connect to SolentGuest.

Once connected, a browser window should open and offer the following options:

- Log in Guest Internet. This requires valid login details
- Event Visitor Registration. This requires valid event code* to register
- Device configuration. For SolentNet and eduroam users

* The event code (that changes daily) is obtained from building receptions or the Conference Centre and is for event attendees. University students and staff should connect to SolentNet on campus and eduroam when off campus.

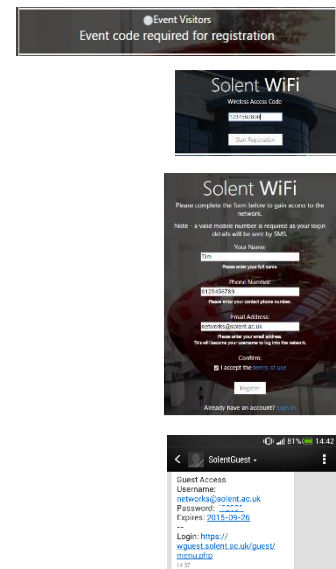

Event Visitor Registration

1. Select Event Visitors option from the menu.
2. Enter Event code.
3. Enter registration details.

Please note:

- You require a valid UK mobile number to register.
- The time it takes for the password text message to arrive is dependent on your mobile network, we have no control over this.

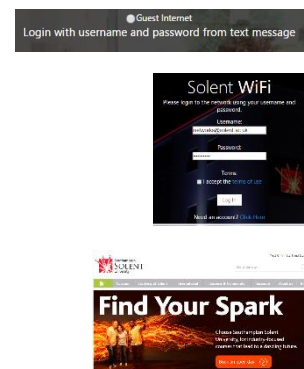

4. You will receive text message with password.
The link in the message will take you back to the login page.

Guest Internet

1. Select Guest Internet option from menu.
2. Enter your email address and the password received in text message (see 'Event Visitor Registration' above).
Note: Please read and accept the terms of use.

3. Upon successful login you will be directed to the university website.
You now have internet access.

Device Configuration

This option configures your wireless device to *securely* connect to either SolentNet or eduroam.

1. Select Device Configuration option from the menu.
2. Follow on-screen instructions from there.
